Brookville Arby's Visits MVCTC Pre-School

Clayton, Ohio – The students in the Miami Valley Career Technology Center (MVCTC) Early Childcare Education program, both pre-school and high school students, were recently visited by the Arby's Oven Mitt from the Brookville Arby's. The Oven Mitt visited with the pre-school students and brought each child a cookie.

The MVCTC Preschool is unique in that it is run by junior and senior students as part of the Early Childhood Education program. The program's instructors, Connie Marshal and Darnice Wilkinson, educate students on all areas of child development, instructional strategies, and curriculum set forth by the State of Ohio Board of Education. Students apply their knowledge and skills by operating a fully functional preschool for three to five year olds. Every day the preschoolers explore and learn through various activities designed and implemented by these bright young educators.
