For Immediate Release –*April 2010*

MVCTC Computer Information Technology Student, Daniel Jasnowski Hired as Website Developer

Clayton, Ohio –Miami Valley Career Technology Center (MVCTC) senior Computer Information Technology student, Daniel Jasnowski (Northmont) was recently hired by iBoomerang.com in Dayton, to do website development and management.

MVCTC students that meet the grade and attendance requirements are able to work in a job that is consistent with their career technical program the second semester of the school year as an Advanced Placement position. This provides students the opportunity to put to use what they have learned in their career technical lab. Students attend MVCTC in the morning for their academic classes and go to their qualified place of employment in the afternoon. The career technical instructor and employer work together and grade the student on their performance at the Advanced Placement position. This is a wonderful opportunity for students to learn first-hand about their chosen career field and often times can lead to full-time employment upon graduation.

A student in the MVCTC Computer Technology Academy (CTA) will learn core skills essential to a successful career in the information technology (IT) field. This includes career pathways in:
- Computer Engineering and Automated Technologies
- Computer Repair and Technical Support
- Game Programming and Web Applications
- Technical Intelligence

During junior year, students will spend a quarter with each of the four instructors learning the basics of each area and have the opportunity to earn 15 college credit hours in core IT concepts. All students enrolled in the CTA are also

eligible to receive a $3,000 Tech Prep scholarship to Sinclair Community College. At the end of the junior year, students will be able to choose a specialization area to concentrate on during senior year and possibly earn more college credit in their specialized field.

For more information about the Computer Technology Academy or any of the other exciting career programs offered at MVCTC, please visit www.mvctc.com.
