For Immediate Release – **August 2011**

MVCTC Alumnus Shares Story on Importance of Safety

Clayton, Ohio -- Zane Wetzel, 2004 alumnus from Miami Valley Career Technology Center (MVCTC) Heavy Equipment program and Arcanum High School, spoke to MVCTC Construction Trades students about OSHA Safety and Safety on the job site. Hit with 69,000+ volts of electricity while working for a power company in Maine, Zane's family was not sure he would survive. Zane felt he needed to come back to MVCTC from Maine, where he lives with his wife Courtney, to speak to students about the importance of safety. Zane has a passion to tell "His Story" about how one mistake could change your life.

MVCTC Carpentry Instructor, Kelly Kramer, said of Zane's story, "Safety on the job site is 'Number One Priority' of MVCTC and our Employers. It's a great learning experience when our students have had the chance to witness how an accident can affect you and your family's lives."

MVCTC Masonry Instructor, Craig Van Culin, shared, "It doesn't always happen to the other guy. Zane's story included how it affected everyone involved. Zane is a great inspiration to the students. Thank you Zane."
